Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was a subdermal drug delivery device that is implanted in a patient that has a galvanic cell that creates its own power supply with enough current to transport a medicament to the desired area because of the ionic fluid that is present to complete the circuit between the two electrodes and conductor, thereby causing the driving force of the electrotransport device.

With regards to claim 112, the allowable subject matter not found was a drug delivery device that is implanted on a patients conjunctiva, which will create the power source since the ionic fluid of the mucous membrane will activate the circuit and complete the power source between the semipermeable membrane, electrodes, and a conductor to drive the medicament into the patient from the second surface of the membrane.

The independent claims also include other patentable subject matter in combination with the other elements or steps of the claim not mention in the above paragraph.

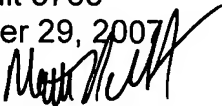

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew F. DeSanto whose telephone number is 571-272-4957. The examiner can normally be reached on Monday-Friday 9:30-6:00.
